WITS Changes – 17.1.0 Release (SUD)
9/19/2014

In the 17.1.0 Release 7 bugs were repaired in WITS. Below are a summary of the errors and the resolutions of the problems.

1. Admission - Substance Abuse: Unable to map different substances to the same TEDS code **Resolution**: Fixed an issue where users were unable to map different substances to the same TEDS code.

2. Staff Profile: Comments field is aligned to the left of the field above it **Resolution**: Comment box and text wrapping (End Date, Perf Rev & Last TB Test Date fields) issues in the "Staff Profile" screen has been fixed. A slight (about 1 pixel) field alignment difference still displays for Users on IE11 ONLY for the "Comment box" which the team has determined to be acceptable because of the complexity in fixing this.

3. Tx Team Groups>Group Profile - Field label wrapping **Resolution**: Fix the wrapping text on the Treatment Team Group Profile screen so that it appears on only one line.

4. Agency Billing Invoice: Field label wrapping and alignments **Resolution**: Fixed the word wrapping and misaligned "Authorization Period" & "Adjudicated Date" fields on the Cost Reimbursement Invoice Search screen.

5. Agency Billing: Multiple Alignment and Wrapping Issues **Resolution**: Corrected the wrapping text on the Claim Item Profile. Corrected the wrapping text and field label spacing issues on the Authorization Search/List screen. Corrected the wrapping text on the Billing History screen.

6. Billing History: Client name and UCN are missing from header **Resolution**: Added the Client name and UCN back to the header.

7. Intake: Clients cases are being closed automatically prior to GPRA discharge **Resolution**: For positive clients that are not eligible for follow up, the nightly processor will now only close the case after entering a GPRA discharge record.

The 17.1.0 release took place September 22, 2014. When these changes are made in Idaho-Mountain and Idaho-Pacific, the top left portion of your screen will say 17.1.0.

17.1.0
